QUALITY BORESCOPIES AT GREAT PRICES

## AVIS Accessories

<p>The Avis Video Imaging Scope system has a variety of options available for purchase. Here are (3) of the more common accessories.</p>	
<p><b>P/N AVIS-TIP</b> is shown to the right. Note the (2) miniature removable objective lens used with the Avis system. The unique lens removeable tool is shown in the middle of the photo that allows the end user to quickly change lens and readjust focusing as needed.</p>	
<p>Shown to the right is the very distal end of the AVIS Videoscope. Note the (2) pin holes for focusing adjustment and lens removal.</p>	
<p><b>P/N AVIS-TIP90</b> allows the AVIS scope to view directly to the side without articulating the scope. This optional component is very useful for difficult access areas such as in tubing.</p>	
<p><b>P/N V-LCD4-</b> this small video monitor is available allowing excellent portability when using the AVIS Videoscope for inspections where a 13" monitor is impractical.</p>
