

High Intensity Light Source

Micro-Sunlight 24

NEW PRODUCT!!! Get Xenon like performance at a fraction of the price. Up to 75% brighter than our standard Halogen light sources- the new Micro-Sunlight 24 unit is the best choice for price and performance. Using a proprietary bulb that provides true daylight/pure white light illumination - this unit offers exceptional performance increases especially on smaller diameter scopes with small light fiber bundles, clearer imaging, better color balance and the best choice for use with any of our scopes using color video options. The lamp life is significantly longer than halogens and it is housed in a very small size case making it extremely portable.
